

# ABO Group and Rh Type

Test ID: 7788

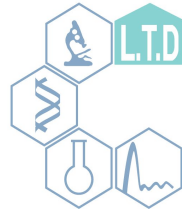

CPT: 86900, 86901

## Clinical Significance:

Determination of ABO blood group and Rh type for transfusion candidates. Group and typing of expectant mothers and newborns may indicate potential for ABO hemolytic disease of the fetus/newborn. Rh typing is used to determine Rh immune globulin candidacy for prenatal and postpartum patients.

## Profile Components:

ABO Group and Rh Type

# Labtech Diagnostics

### Container:

ACD-A or ACD-B (yellow-top) tube,  
EDTA (lavender-top) tube

### Transport Temperature:

Room temperature

### Specimen:

Whole blood

### Specimen Stability:

Room temperature: 72 hours  
Refrigerated: 6 days

### Reject Criteria:

Hemolysis, Received frozen, Serum  
Separator Tube (SST®) Frozen:  
Unacceptable

### Days Performed:

Mon-Fri

## Collection Instructions:
