

Aldosterone , Serum

Test ID: 17181

CPT: 82088

Clinical Significance:

Investigation of primary aldosteronism (eg, adrenal adenoma/carcinoma and adrenal cortical hyperplasia) and secondary aldosteronism (renovascular disease, salt depletion, potassium loading, cardiac failure with ascites, pregnancy, Bartter syndrome)

Profile Components:

Labtech Diagnostics

Container:

Red-top tube (no gel) or
EDTA (lavender-top)

Transport Temperature:

Room temperature

Specimen:

Serum or Plasma

Specimen Stability:

Room temperature: 4 days
Refrigerated: 7 days
Frozen: 28 days

Reject Criteria:

Days Performed:

Mon-Fri

Collection Instructions:

Separate serum or plasma from cells within 45 minutes of venipuncture and label it.
