

ANA Screen , with Reflex to Panel

Test ID: 249

CPT: 86038

Clinical Significance:

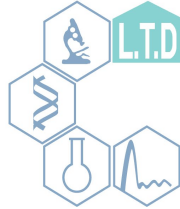

ANA screen through a combination of IA & IFA methods

The ANA Reflex provides physicians with a cost-effective and medically justified approach to evaluating a patient with suspected rheumatologic disease. Eleven antibodies associated with specific rheumatologic disease entities are analyzed and resulted in sequential tiers until positive findings are reported. The test is not intended for the work-up of autoimmune hepatitis or other non-rheumatologic diseases.

Profile Components:

iff the ANA IA or IFA Screen is positive, it will reflex to Pattern & titer and the following antibodies :

dsDNA Ab , Anti-SSA Ab, Anti-SSB Ab, Smith Ab, Sm RNP Ab, Ribosomal P Ab, Scl-70 Ab, Centromere B Ab, Jo-1 Ab, RNP Ab, Chromatin Ab

Labtech Diagnostics

Container:

Serum Separator Tube (SST®)

Transport Temperature:

Room Temperature

Specimen:

Serum

Specimen Stability:

Room temperature: 4 days
Refrigerated: 7 days
Frozen: 30 days

Reject Criteria:

Gross hemolysis • Grossly lipemic
• Grossly icteric

Days Performed:

Mon-Sat
*Turnaround time 48 hours
from time received

Collection Instructions:
