

# Autoimmune Hepatitis Diagnostic Panel

Test ID: 19873

CPT: 86038, 86255, 83516, 86376

## Clinical Significance:

The detection of a number of autoantibodies supports the diagnosis of autoimmune hepatitis.

## Profile Components:

ANA Screen (IFA) with Reflex to Titer, Mitochondrial Antibody with Reflex to Titer, Actin (Smooth Muscle) Antibody (IgG), Liver Kidney Microsome (LKM-1) Antibody (IgG)

# Labtech Diagnostics

## Container:

x2 Serum Separator Tube (SST®)

## Transport Temperature:

Refrigerated

## Specimen:

Serum

## Specimen Stability:

Room temperature: 4 days  
Refrigerated: 7 days  
Frozen: 30 days

## Reject Criteria:

Received room temperature

## Days Performed:

Mon-Fri

## Collection Instructions:
